# Project Overview

# The Power of Project Branding

## Background

Project NorthStar is our Enterprise Resource Planning (ERP) and Enterprise Performance Management (EPM) modernization initiative to deploy centralized software that manages procurement\*, accounts payable, invoicing, cash application, accounting, forecasting, and the associated data and reporting.

\*In conjunction with Traton Procurement System

## Objectives

- ☒ Reduce system downtime
- ☒ Enable strategic initiatives
- ☒ Reduce insight to action time
- ☒ Empower Employees

# Project Management

## Project Leaders

Becky Zeman, Director of F&A Transformation  
Mark Ames, Information Systems Director

## NorthStar Product Owner

Catie Shah, Finance Process & Systems Sr. Manager

## Project Management

Teresa Hamaker, Accounting Manager Sr.  
Jessalynn Holman, IT Project Manager Sr.

## Change Management

Adrienne Alvarado, Associate Director F&A  
Transformation

## Technical Leads

TBD, Business Architect \*  
TBD, Solution Architect \*

if you have any questions!

# Your Participation is Critical to NorthStar's Success

Process Expertise

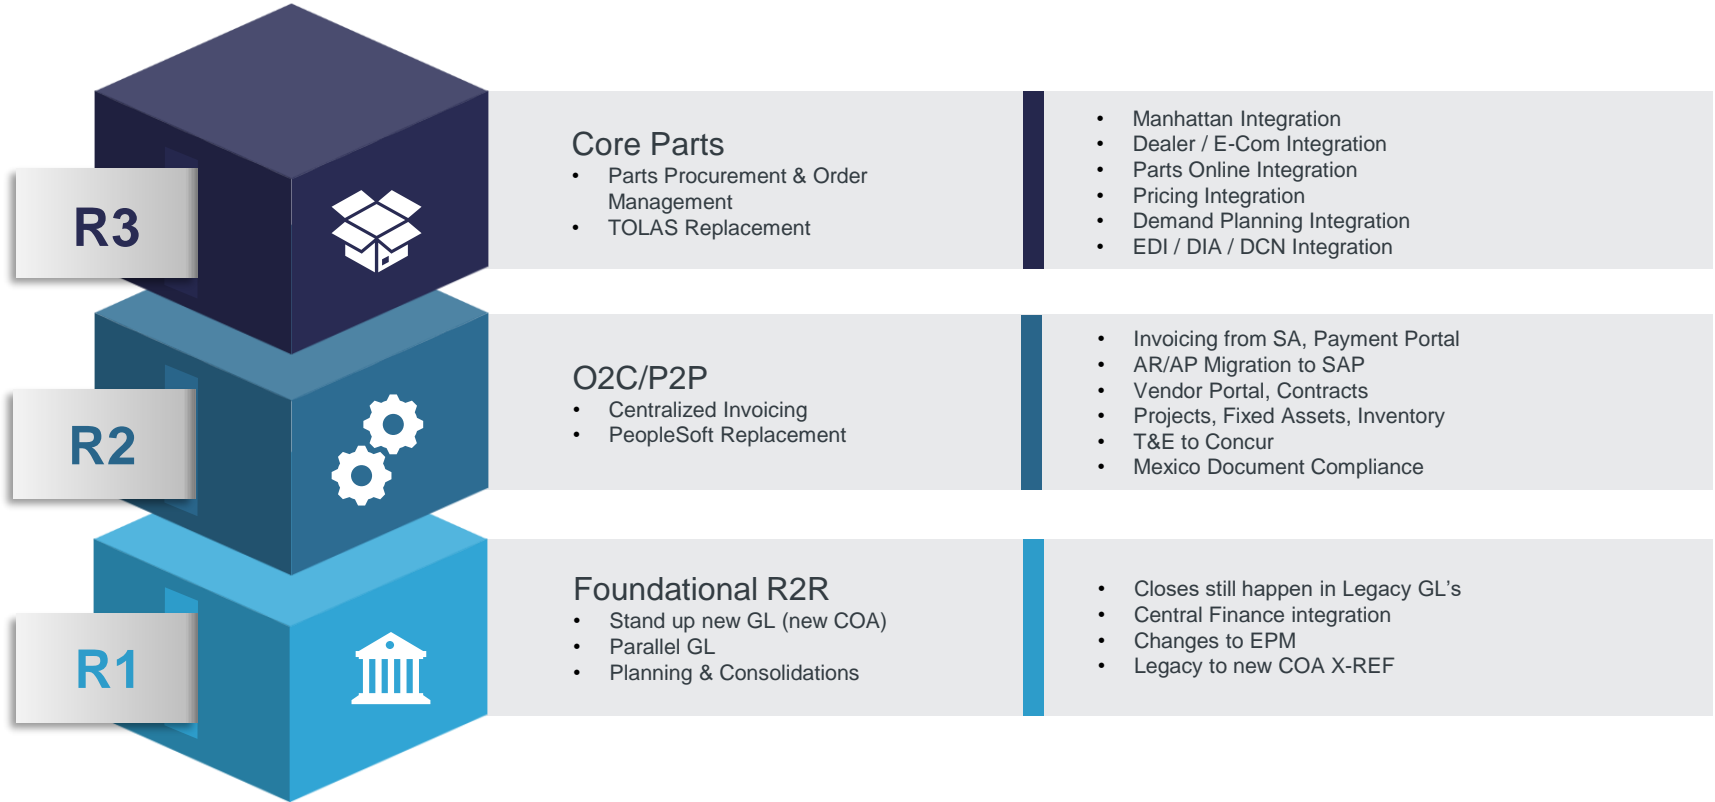

Outspoken Nature

Continuous Improvement Mindset

Leadership Capabilities

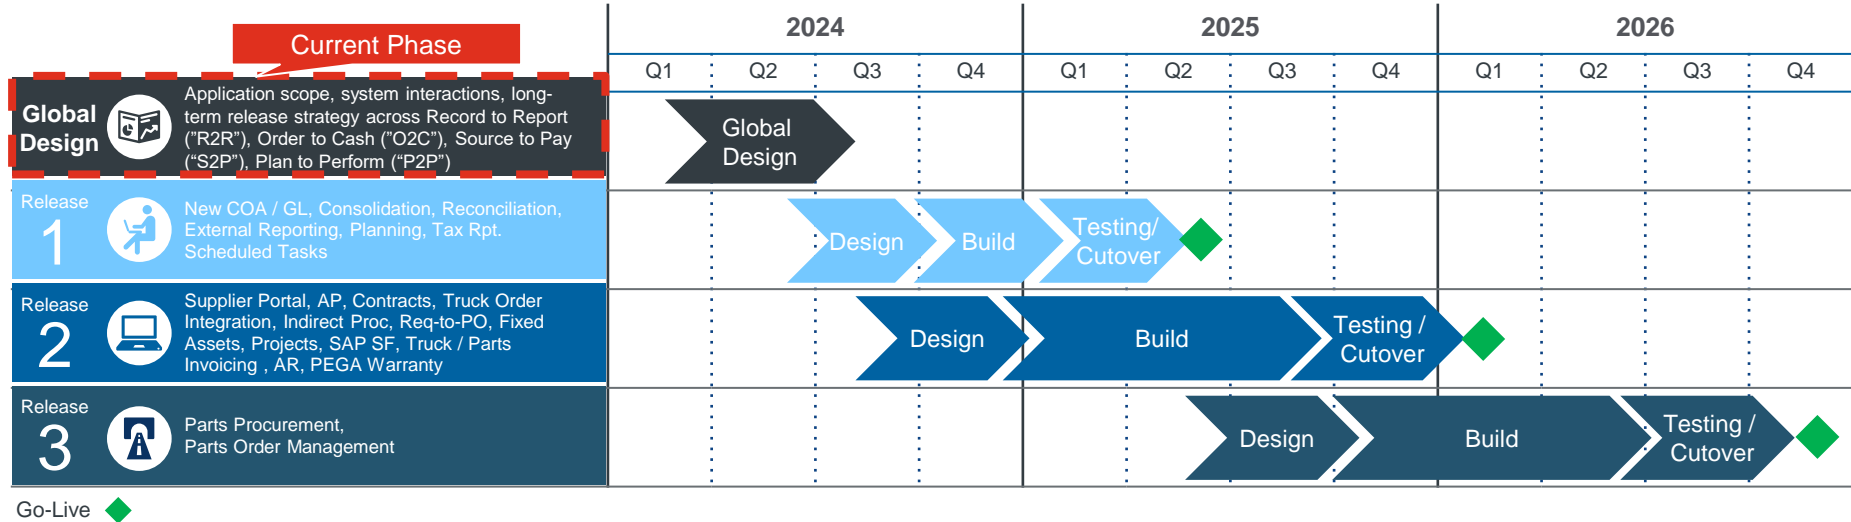

# Project Scope

# Project NorthStar Timeline

# Successful ERP Modernization requires a Fit-to-Standard approach that will enable the flexibility for capability differentiation

## What is Fit-to-Standard?

Fit-to-Standard is an SAP best practice that helps **adopt** and **unlock** transformation value by ensuring organizations utilize the system as close to the standard as possible, only making exceptions where necessary. This enables us to **define** 'future state' end-to-end process flows, while **identifying** gaps and defining backlogs.

Begin with demonstrations of SAP Standard Processes

Understand considerations at Navistar and the why behind possible customizations

Gradually refine future-state system functionality and key design decisions

*A guiding principle of the program is to avoid building legacy processes again and transform into industry standard processes*

### Exception Management Decisions:

Is it driven by **legal** or **regulatory** requirements?

Does it provide a **competitive advantage** or **differentiating capability**?

Does it provide **long-term benefits** and align with **Navistar's future goals**?

Is it **requested** by **most of Navistar's customers** or critical for retaining **high value customers**?

# Global Design Deep-dive

# Global ERP Design Round 1: Objectives and Expectations

**Your expertise and knowledge** will be critical success of this project and will be the foundation for Round 1:

## Global Design

### Foundational Workshops Objectives

1. Introduce and explore SAP Fit-to-Standard concepts to the Core group – we expect to answer a lot of questions and welcome it
2. Introduce the SAP Enterprise Hierarchy and Master Data and begin to design the company code, plant and purchasing org structures for Navistar. During these sessions, the PWC SME's will be explaining the definitions and usage of the mandatory and key SAP fields. The SMEs will also address questions on how the hierarchy-design impacts the standard processes
3. Identify Navistar Business Differentiators and Use Cases where fit to standard might need tweaks
4. Document known big gaps and risks that require more attention during Round 2 (business pain points)
5. Align on an initial Fit-to-Standard design for each Level 3 Processes and identify any significant changes.
6. Determine which key use cases require demos in Round 2 (business differentiators)
7. Prep as a Core Team to share the floor together in Round 2

### Our ask from you:

#### *Prepare*

- ☐ Review current state business process documentation
- ☐ Familiarize yourself with process exceptions
- ☐ Identify key considerations for discussion

#### *Participate*

- ☐ Attend workshops and follow-ups by value stream
- ☐ Actively participate and be vocal throughout the process
- ☐ Lookout for additional communications

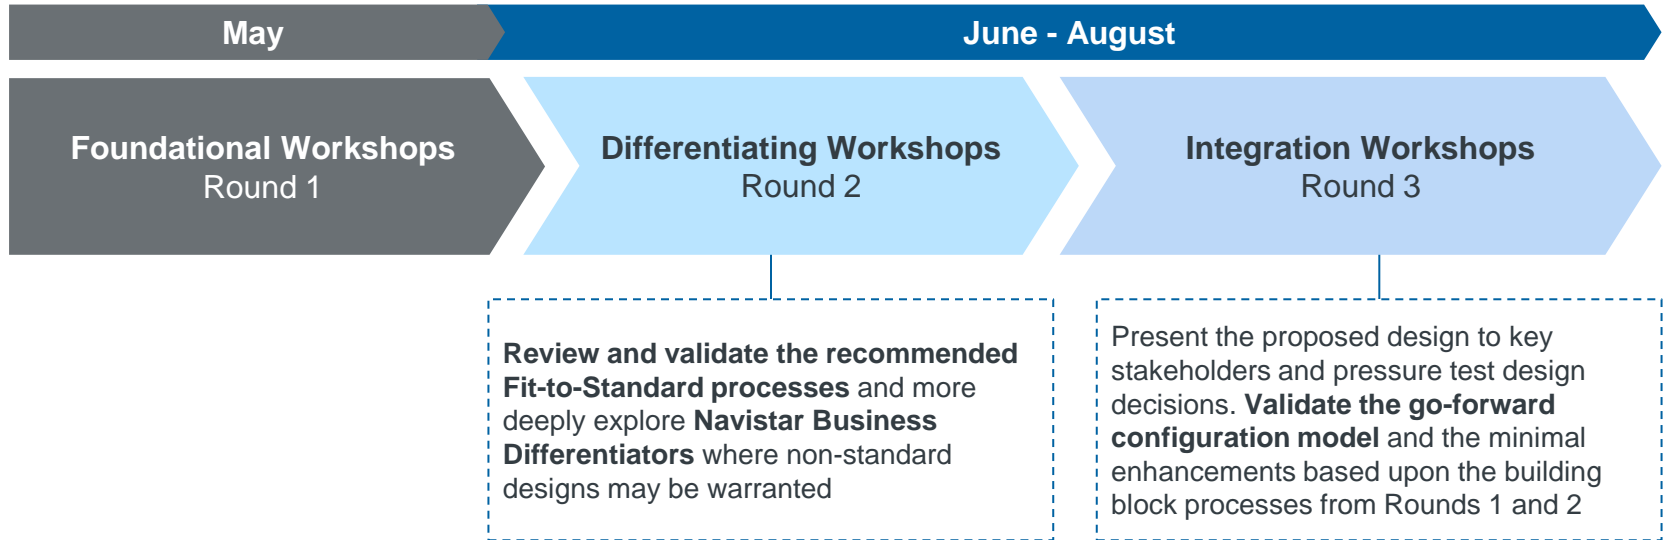

#### *Activate*

- ☐ Keep your teams informed of your participation and key takeaways
- ☐ Share key messages from the project team with your teams
- ☐ Reach out to our teams at [ProjectNorthstar@Navistar.com](mailto:ProjectNorthstar@Navistar.com)

# Global Design will continue across three iterative cycles

Building upon the foundation of the Foundational Workshops, we will begin Rounds 2 and 3:

*Increased opportunities for engagement and participation will be available as Global Design continues*

## Next Steps

# Next Steps

- 1 Attend workshops
- 2 Learn our new software!
- 3 Provide subject matter expertise
- 4 Provide requirements for the future state
- 5 Champion the Change

# Using Miro

# Effectively utilizing Miro

All users can leverage Miro without logging in, simply click on the link to the board for each session and leverage the quick tips below:

## Miro

### Navigation

#### Using a mouse to navigate

Click and drag the canvas to pan around the board

Zoom by scrolling the mouse wheel!

#### Using a trackpad to navigate

Scroll the board in any direction by sliding two fingers

Zoom by pinching in and out

### Icons to remember

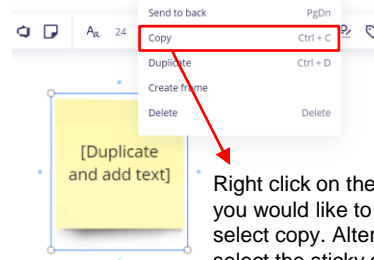

In most cases, our Miro boards are built so you can simply copy and paste sticky notes where needed. We have outlined how to do this below:

#### 1 Ensure your arrow is activated

To select anything in the board, make sure the arrow in the tool bar is blue

#### 2 Copy and paste a sticky

Right click on the sticky note you would like to copy, then select copy. Alternatively, select the sticky and hit Ctrl + C

Now that you have duplicated your sticky, populate accordingly

Thank You
